Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Applicant's amendment and response to the Office Action filed on July 27, 2001 has been entered and considered.
2. Claims 1-15 are presented for examination.
3. Applicant's submission of references on form PTO-1449 has been considered. A signed copy of the form is attached.

Response to Amendment

4. The objection made to claim 3 is withdrawn in light of the amendment of claim 3.
5. The rejection of claims 1-15 under 35 USC §102(b) as being anticipated by Haines, et al. (USPN 5,251,148) is **maintained**.

Response to Arguments

6. Applicant's arguments filed July 27, 2001 have been fully considered but they are not persuasive.

Applicant argues that the reference of prior art to Haines, et al. does not describe or suggest an open loop method of controlling flow rate. In response to this argument, the recitation of the open loop method has not been given patentable weight because it has been held that a preamble is denied the effect of a limitation where the claim is drawn to a method and the portion of the claim following the preamble is a self-contained description of the method not depending for completeness upon the introductory clause. *Kropa c. Robie*, 88 USPQ 478 (CCPA 1951).

As for the Applicant's comments regarding the determination and adjustment of a target valve stem position, Haines, et al. teach of a throttle element which is movable to selectively vary the flow rate of fluid flowing, see column 2 lines 36-37 and column 5, lines 22-30. Haines goes on to explain the adjustment of the valve position based on the pressure signals received by sensors. A utilization device receives these signals and then develops control signals used to move the throttle element as required; thereby adjusting the throttle to a position that matched the flow rate (see column 2, lines 40-51 and column 8, lines 47-51). A target flow rate is inherent to such systems wherein pressure or fluid flow is present. Too much or too little pressure or flow of fluid can be detrimental; therefore, establishing an appropriate level or rate is essential for proper production.

For the reasons stated above, the limitations of the claimed invention is taught by the prior arts of record; thereby, rendering the instant claims, 1-15, unpatentable.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
